

Gastronomic bikes accessories

Endless possibilities

GASTRO

WHY CHOOSE US?

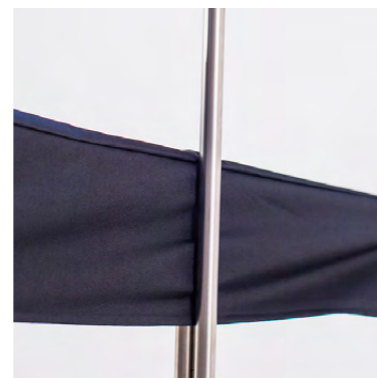

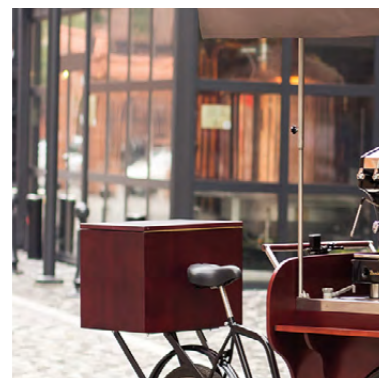

Gastronomic bikes have infinite possibilities when it comes to mobile sale.

They, themselves are the basis for the preparation of coffee, ice cream, hot dogs, pancakes or other products.

The perfect complement to creating completely new possibilities in terms of work ergonomics and products presentation are the accessories.

In this catalogue you will find the necessary additives for preparing various types of products, and also those that significantly expand the bike and at the same time make it unique.

An additional element of the catalogue are professional cleaning products thanks to which you will maintain your equipment in good both visual and technical condition.
