

POP-UP Cart

Endless possibilities

GASTRO

WHY CHOOSE US?

Pop-Up Cart is a new and truly ground breaking innovation in its class, that is built from a foundation of strength, knowledge and experience.

Part of the JG GASTRO group of companies, Pop-Up Cart is the creation of JG Gastro's founder Jakub Gawrilow.

JG Gastro is one of the largest manufacturers of steel furniture and kitchen equipment, servicing the Polish market for over 10 years and is one of the largest European producers currently of mobile food bikes, carts and stands.

Pop-Up Cart was created to help those businesses that needed to showcase their products or services, where space and storage were at a premium for them, as well as finding an economic way of transporting the stand to the event.

Foldable and compact... Pop-Up Cart has the answer!

This sleek cart can be transported in the boot of a normal passenger car and can be assembled in minutes, seven minutes to be precise, and you don't need to use a single tool to assemble it!

The cart comes with a custom made bag for easy mobility and can be stored virtually anywhere once folded down. The minimal and elegant design will help to attract the eye to what is most important, your businesses products or services!

Does your business ever need a multi-purpose and convenient sales stand?

Does it participate in culinary events or trade shows?

Then Pop-Up Cart could be the perfect solution for all your needs!

Order Pop-Up Cart and start selling now!

What is the roof covering made from?

The roof cover is made from waterproof, gummed Codura material. This material is stiff, durable and made to last

What is the structure made of?

The construction is made from strong steel making the cart extremely stable and solid, suitable for intensive use and repeated unfolding and folding of the elements.

How does the folding of the cart work?

Through its superior design the sheets of steel join together down to the last millimetre forming a rigid structure without the need for any tools.

What are the worktops made of?

The worktops are made from stainless steel. A quality material approved for contact with any food. The sheets are light yet extremely durable.

What about a storage space?

With Pop-Up Cart you won't have to think about renting out extra space for your stand if you don't have space in your businesses premises! The cart can fit easily in virtually every business taking up less than 1.5 m2 of your valuable space!

How to transport?

Pop-Up Cart has been designed so it can be transported in the boot of most passenger cars. When folded its exact dimensions are 1450x980x150 making it the smallest stand of its type in the world!

Where can it be used?

Trade shows, fairs, markets, catering, receptions, wedding, the possibilities are endless! Wherever your business needs an elegant stand that is quick and easy to assemble and fold away!

Is it possible to make adjustments to my cart?

Absolutely.. with our series of accessories there are numerous adjustments that can be made without the need for any tools! For example, you can replace the worktop for a worktop with a sink...you take out the middle shelf and insert a cooling table...you can add a special lamp if needed and many other possibilities.. check out our accessories range for the full list of adjustments to compliment the Cart.

Pop-Up Cart is a series of carefully designed steel elements and metal sheets that if spread on the ground would cover 10 m2. Due to the unique design of the entire structure, the larger elements of Pop-Up Cart fold into one another making it extremely portable and compact.

The Folded cart is packed into a special canvas bag that protects the cart and makes it easy to transport. The larger steel elements are transported independently to ensure the weight is manageable during handling and which fold down into each other, making them as small and compact as is physically possible.

After assembly, which takes one person approximately 7 minutes, you get a full sized sale stand equipped with additional side shelves, two further shelves under the counter top and a roof that offers protection for the stand as well as adding appeal. Everything is ready then to add further accessory extensions seamlessly if required.

It is an illustrative drawing.

Description

Pop-Up Cart is the perfect solution for anyone who needs a sales stand thats portable, compact, durable, foldable and that looks great!

Pop-Up Cart has so many uses it's impossible to name them all here. Think trade shows, markets, events, catering, weddings, fairs or simply to put outside your current business location!
