LOAD CAPACITY 500 KG  
TRANSPORT WHATEVER YOU WANT

A RELIABLE TOOL  
TO GROW YOUR BUSINESS

**Cargo bikes have become part of the urban lifestyle for good. They also help in growing the business.**

Our cargo bike is the most durable bike of this type available on the market. Equipped with a capacious box, a solid base and durable wheels, it is a perfect tool for everyday work.

**FIRM BIKE FRAME**

The double tube frame ensures stable driving as well as solidity of the whole construction. It's screwed to the front part of a bike so it can be disassemble easily during servicing or shipping. While placing an order, it is possible to choose a color of the bike frame (RAL color chart).

**STRONG 21" WHEELS**

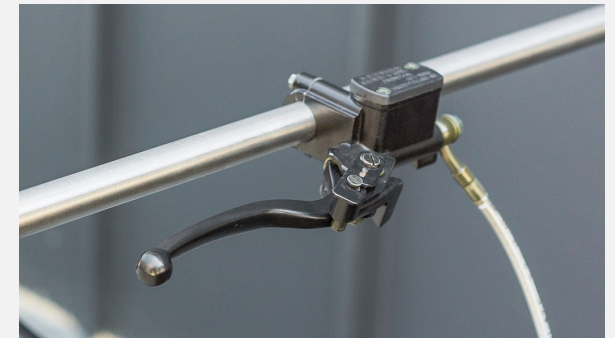

We designed strong wheels with a diameter of 60 cm which make moving around a city facile and comfortable.

**BOX**

A capacious box with dimensions of 1200x700x550 mm will fit parcels, shopping bags and much more. The hatch is equipped with hydraulic cylinders to facilitate opening.

**TURNING RADIUS: 4 M**

A turning radius was optimized so a bike can easily cross the streets. Turning limiters are responsible for safety and guarantee stability of a bike.

**HYDRAULIC BRAKES WITH AN OPTION OF PARKING BRAKE**

The strongest brakes available on the market guarantee safe driving. A parking brake facilitates placing a bike while working.

A GREAT HELPER IN THE DAILY  
OPERATION OF THE RESTAURANT

**Brake type:**  
hydraulic with parking option

**Box material:**  
stainless steel

**Front wheel size:** 21"

**Rear wheel size:** 20"

**WHAT IS THE LOAD CAPACITY OF A CARGO BIKE?**

Total permitted weight including a person, devices, and products is 500 kg.

**IS IT POSSIBLE TO MOUNT AN ELECTRIC DRIVE ON A BICYCLE?**

Yes, there is such a possibility. We recommend the installation of electric drives when covering longer distances, driving on slopes and when transporting heavier goods.

**CAN I RIDE ON A GASTRONOMIC BIKE COMFORTABLY?**

On a flat surface you can ride on a bike comfortably. You need to be careful on bumpy roads, as well as on kerbs. Overcoming long distance may be burdensome because of the weight of a bike. If a place where you storage a bike is located far from a sale place, we recommend electric engine or to transport a bike by car or trailer.

**IS IT POSSIBLE TO PERSONALIZE THE BOX IN THE BIKE?**

Yes, there is such a possibility. If you need to make a box of a different size than the standard one or introduce changes that will facilitate the work, an individual quote is needed.

**HOW CAN I ORDER A BIKE?**

You need to choose a bike, accessories, and a colour of a bike. We prepare a technical drawing with a description to make sure everything is clear. If necessary, we can make a visualisation which costs 300 PLN net.

While placing an order, you need to pay 50% of the total amount as a advanced payment. The other 50% need to be paid before delivery of a bike. A bike may be shipped while to total amount was paid. If it is possible, we recommend you to come and check a bike before shipment.

**IS A SHIPMENT INCLUDED?**

No. The service is provided by an external company. Please note that we are not responsible for the delivery time.

**IS IT POSSIBLE TO RENT A CARGO BIKE?**

Yes. Details in the tab <https://jggastro.com/mobile/pl/rental>.

**ARE THE PRICE AND A PAYMENT METHOD NEGOTIABLE?**

The price should be set individually with your local distributor. Special discounts are available from 3 bikes purchased one-time. While ordering one bike, the price is constant.

A production of a bike takes 5-6 weeks. Sometimes, it is possible to produce a bike a little bit faster - it depends on the quantity of orders on our production. In case of busy time on production, the term may be extended, and we always inform about it. You should remember that while a bike is ready and, for example, we will receive your payment few days later, a load time will be longer..
