Description

A coffee bike has matched a city scenery long time ago. Classic design in combination with a unusual form of sale attracts hundreds of coffee lovers. A basic coffee bike is made of waterproof, veneered plywood, includes a 2-groups gas-electric coffee machine, a coffee grinder, a water pump, and an electrical installation.

Side shelves and cup dispensers facilitate everyday work, and a back carrier gives an additional storage space.

We designed water containers as well as an electrical installation in the front part of a bike so you can access them easily. You can refill the water containers and check the battery level anytime. Charging is extremely easy – all you need to do is to connect the installation to a plug using typical 230 V cable.

While ordering you can personalise your bike by choosing a type and a colour of a box, and a colour of a frame, mudguards, and a roof.

Dimensions

- 1 Box (mm): 1300x800x550 h
- 2 Bike (mm): 2600x1100x2200 h
- 3 Total (mm): 3250x1100x2200 h
- 4 Heigh (with a folded roof) (mm): 1700 h

Variants

- 1 Wooden
- 2 RAL painted

Strong 21" wheels

We designed strong wheels with a diameter of 68 cm which make moving around the city facile and comfortable.

Folding top

In front of a bike, we can put an additional folding top (55 cm) which will increase your working space over 40%. Easy opening and folding is guaranteed by the system of guideways and latches.

Firm bike frame painted at any colour

The double tube frame ensures stable driving as well as solidity of the whole construction. It's screwed to the front part of a bike so it can be disassemble easily during servicing or shipping. While placing an order, it is possible to choose a colour of the bike frame (RAL colour chart).

Hydraulic brakes with an option of parking brake

The strongest brakes available on the market guarantee safe driving. A parking brake facilitates placing a bike while working.

Turning radius: 4 m

A turning radius was optimised so a bike can easily cross the streets. Turning limiters are responsible for safety and guarantee stability of a bike.

Huge pushing handle

A huge pushing handle not only looks good but also facilitates riding on a bike. The handle is made of a round stainless steel profile and it will survive even the farthest trips.

Box

Make your bike unique! You can choose from three different versions: waterproof plywood, stainless steel and RAL painted.

Waterproof fabric roof

A roof is made of waterproof Cordura fabric. It is strong and resistant to mechanical damage. In order to wash the fabric, you can easily take it off from a frame. You can choose the colour of the material, and moreover we can put your company logo on it.

Side shelves

The side shelves improve appearance of a bike and provide an additional space for accessories. The shelves are set in a special way which guarantees stability of the products which stands on them.

Folding side covers

In order to make storage of a bike as easy as possible, we designed folding side covers. Simply, you need to raise one element and the covers are folded.

Gas coffee machine

A manual, or electrical coffee machine equipped with a gas installation and a built-in water pump. According to your needs, a coffee machine may use a gas or electrical installation during working. You simply need to push a bottom to change a power supply. You can choose from three different colours of a machine: silver, red, and black.

Folding roof

A construction of a roof is made of circle profiles, and it can be folded easily. We designed strong screws to prevent from folding of a roof in an unexpected moment.

Built-in sink

A bike includes a built-in sink in which you may wash your hands, or some accessories. It is connected with water containers which you can refill and clean easily. A dirty water container can be cleared out by a valve located under a bike.

Optional box carrier

To increase a storage space, you may add a box carrier to your bike. A folding cabinet with a dimension of 600x400x400 h may easily hold useful items. You can choose a colour of a box.

Stainless steel top

To increase the quality, and to improve cleanliness of work, we designed a stainless steel top which is easy to clean and resistant to mechanical damage.

Possibility of removing of a roof

In order to facilitate transport and storage of a bike, we designed a removing roof. Simply, you need to turn some screws, and a roof is removed. Moreover, if you get bored of a colour of a roof, you can easily replace it.

Easy to refill water container

In our bike, we use reliable mobile power technology which consists of gel batteries, a charger, and a converter. Charging is extremely easy – all you need to do is to connect the installation to a plug using typical 230 V cable; it lasts about 6 hours. The installation includes a display on which you can check the battery level.

Master key

You can open all the cabinets using one master key. If the key is lost, we will provide you with a new set of keys.

Easy to refill water container

A clean water container with a capacity of 20 l is equipped with a water infusion. Inside a container we used special division which guarantees that water won't spill out during moving. Moreover, you can easily remove water containers in order to clean them.

Bolted coffee machine

To increase safety as well as stability, a coffee machine is screwed to a top. The screws are located in a folding part under a coffee machine groups.

Large storage cabinet

As the only company, in such a small space we managed such a large storage space. A cabinet with a dimension of 850x760x480 h which can be opened in the front part of a bike, will hold all your products and accessories. A bottom part of a storage cabinet is perforated – it is extremely important in case of bikes with gas supply.
