MULTI-FUNCTIONALITY
BASED ON EXPERIENCE

BUSINESS CONCEPT
THAT GENERATES PROFITS

Do you know anyone who doesn't like ice creams? We don't think so... With our ice cream bike you may reach your customers without opening an ice-cream shop.

Classic look, a boat-shaped box, and a simple, but elegant roof make the bike unique and spectacular.

Our mobile power system guarantees a possibility of working all day without necessity of connection to an electrical network.

**FIRM BIKE FRAME**

The double tube frame ensures stable driving as well as solidity of the whole construction. It's screwed to the front part of a bike so it can be disassemble easily during servicing or shipping. While placing an order, it is possible to choose a color of the bike frame (RAL color chart).

**STRONG 21" WHEELS**

We designed strong wheels with a diameter of 60 cm which make moving around a city facile and comfortable.

**HUGE PUSHING HANDLE**

A huge pushing handle not only looks good but also facilitates riding on a bike. The handle is made of a round stainless steel profile and it will survive even the farthest trips.

**TURNING RADIUS: 4 M**

A turning radius was optimized so a bike can easily cross the streets. Turning limiters are responsible for safety and guarantee stability of a bike.

**HYDRAULIC BRAKES WITH AN OPTION OF PARKING BRAKE**

The strongest brakes available on the market guarantee safe driving. A parking brake facilitates placing a bike while working.

WATERPROOF FABRIC ROOF

A roof is made of waterproof Cordura fabric. It is strong and resistant to mechanical damage. In order to wash the fabric, you can easily take it off from a frame. You can choose the color of the material, and moreover we can put your company logo on it.

STAINLESS STEEL BOX

To make your bike unique, we may paint it with any color (RAL color chart). Moreover, you can choose a different color for a box and for a frame - it will be more interesting!

MASTER KEY

You can open all the cabinets using one master key. If the key is lost, we will provide you with a new set of keys.

BUILT-IN SINK

A bike includes a built-in sink in which you may wash your hands, or some accessories. It is connected with water containers.

STAINLESS STEEL TOP

To increase the quality, and to improve cleanliness of work, we designed a stainless steel top which is easy to clean and resistant to mechanical damage.

STORAGE BOX

To increase a storage space, we add a box carrier to your bike. A folding cabinet with a dimension of 600x400x400 h may easily hold useful items.

WATER CONTAINER

A clean water container with a capacity of 8l as equipped with a water infusion, Inside a container we used special division which guarantees that water won't spill out during moving. A dirty water container with a capacity 6l can be cleared out by installed valve. Moreover, you can easily remove water containers in order to clean them.

ELECTRICAL INSTALLATION

In our bike, we use reliable mobile power technology which consist of gel batteries, a charger, an a converter. Changing is extremely easy - all you need to do this is to connect the installation to a plug using typical 230 V cable; it last about 6 hours. The installation includes a display on which you can check the battery level.

ICE CREAM DISPLAY FOR 7 POZZETTI

A built-in freezing device with 7 pozzetti plus an additional 7 underneath as a spare h, and retro style lids. Inside a display, there is a fan (12V). Temperature control between -12C and -21C.

UNIQUE DESIGN

We guarantee that a boat-shaped box will attract customers. Laser cutting and perfect details makes your bike outstanding.

DRAIN

To facilitate defrosting of a display, we designed a special drain which is located in a bottom part of bike. You just need to turn a display off to defrost the ice which will go out through a drain.

stainless steel

Box material:
RAL painted steel

Execution of the roof structure:
stainless steel

Roof finishing:
gummed Cordura

Front wheel size: 21"
Rear wheel size: 20"

POWER SUPPLY – HOW DOES IT WORK?

Due to reliable mobile power technology, gastronomic bikes may work up to 48 hours. A source of power for our bikes are gel batteries which are environmentally-friendly as they do not expend dangerous emissions of sulphuric acid. Their ABS case guarantees safety during moving. The installation includes battery, converter and external charger. Charging time is approximately 6 hours. The installation includes a display on which you can check the battery level. Do not overcharge the devices. Overtaking the average parameters may cause damages in a converter. Do not discharge the battery completely as it may impact its durability.

WHAT IS A CARRYING CAPACITY OF A BIKE?

Total permitted weight including a person, devices, and products is 500 kg.

IT IS POSSIBLE TO ORDER A BIKE FROM WHICH I CAN SELL ICE CREAMS, COFFEE, JUICES AND SANDWICHES AT THE SAME TIME?

Such an extensive sales profile is not possible while considering a gastronomic bike. Because of a limited space available on a bike, you need to define a product you will sell. It is necessary to reach a compromise between accessories (appropriate devices), size (to be mobile it can't be too big), storage cabinets (selling too many products, there won't be enough space to storage them), and electric installation (size of a battery, and gas cylinder). Therefore, we recommend to consider a product you would like to sell from a bike.

CAN I RIDE ON A GASTRONOMIC BIKE COMFORTABLY?

On a flat surface you can ride on a bike comfortably. You need to be careful on bumpy roads, as well as on kerbs. Overcoming long distance may be burdensome because of the weight of a bike. If a place where you storage a bike is located far from a sale place, we recommend electric engine or to transport a bike by car or trailer.

HOW CAN I ORDER A BIKE?

You need to choose a bike, accessories, and a colour of a bike. We prepare a technical drawing with a description to make sure everything is clear. If necessary, we can make a visualisation which costs 300 PLN net.

While placing an order, you need to pay 50% of the total amount as a advanced payment. The other 50% need to be paid before delivery of a bike. A bike may be shipped while to total amount was paid. If it is possible, we recommend you to come and check a bike before shipment.

**ARE THE PRICE AND A PAYMENT METHOD
NEGOTIABLE?**

The price should be set individually with your local distributor. Special discounts are available from 3 bikes purchased one-time. While ordering one bike, the price is constant.

A production of a bike takes 5-6 weeks. Sometimes, it is possible to produce a bike a little bit faster - it depends on the quantity of orders on our production. In case of busy time on production, the term may be extended, and we always inform about it. You should remember that while a bike is ready and, for example, we will receive your payment few days later, a lead time will be longer.

IS A SHIPMENT INCLUDED?

No. The service is provided by an external company. Please note that we are not responsible for the delivery time.
