

Ice cream devices

Endless possibilities

GASTRO

WHY CHOOSE US?

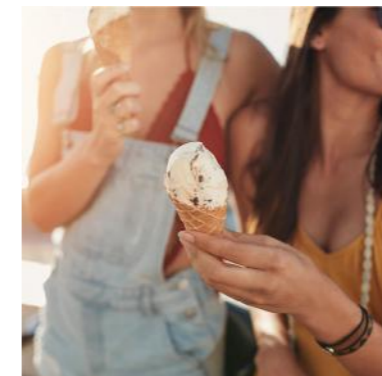

Although ice cream is not an all year round product as its season starts with the beginning of warm days and ends while the cold days come, without no doubts it is profitable to offer it to customers.

Regardless of age, sex, or social group, ice cream has a wide approval. Everyone wants some ice cream on hot days.

An ice cream display may be situated in a restaurant, or in a shopping centre. If there is a garden or a park near your restaurant, you should consider something mobile – a rickshaw, or a bike which definitely will attract attention, and increase profits.

In this catalogue, you may find complete offer of ice cream devices. Ice cream displays, ice cream rickshaws, ice cream bikes, and ice cream carts. Each product in two size versions.

To fulfil individual customer's needs we may paint each product with any colour from RAL colour chart. You have a guarantee that your product is unique.
