MULTI-FUNCTIONALITY
BASED ON EXPERIENCE

BUSINESS CONCEPT
THAT GENERATES PROFITS

Hot dog bike is a perfect solution while we don't have an electricity connection.

It works perfectly in a street, at a festival, as well as in a shopping centre. It's made of stainless steel, and equipped with gas supply.

FIRM BIKE FRAME

The double tube frame ensures stable driving as well as solidity of the whole construction. It's screwed to the front part of a bike so it can be disassemble easily during servicing or shipping. While placing an order, it is possible to choose a color of the bike frame (RAL color chart).

STRONG 19" WHEELS

We designed strong wheels with a diameter of 60 cm which make moving around a city facile and comfortable.

HUGE PUSHING HANDLE

A huge pushing handle not only looks good but also facilitates riding on a bike. The handle is made of a round stainless steel profile and it will survive even the farthest trips.

TURNING RADIUS: 4 M

A turning radius was optimized so a bike can easily cross the streets. Turning limiters are responsible for safety and guarantee stability of a bike.

HYDRAULIC BRAKES WITH AN OPTION OF PARKING BRAKE

The strongest brakes available on the market guarantee safe driving. A parking brake facilitates placing a bike while working.

LARGE STORAGE CABINET

In a hot dog bike we designed two huge cabinets where you can storage your products for a whole workday. In a bottom part of a bike you can put buns, sausages, and extras; and in an upper part you can put beverage cans.

STAINLESS STEEL FINISHING

Our bike is made of stainless steel OH18N9 so it looks wonderful in an urban environment. It is easy to clean, and it's resistant to humidity as well as bad weather.

MASTER KEY

You can open all the cabinets using one master key. If the key is lost, we will provide you with a new set of keys.

SINK

We designed an useful sink in a side shelf. A water container with a gravitational water flow is located in the top shelf, so no electricity is needed. Dirty water accumulates in a bottom cabinet, so it can be clean out easily.

CONTAINERS FOR EXTRAS

On the side shelves of a bike, there are special holes for GN 1/9. You can adjust their height to your needs. It is a perfect space for extras.

STORAGE BOX

To increase a storage space, you may add a box carrier to your bike. A folding cabinet with a dimension of 600x400x400 h may easily hold useful items.

SPACE FOR SAUCES

We designed a space for three favorite sauces. It's extremely helpful as sauces do not fall out while driving. Moreover, they are always at hand and your workplace is always perfectly organized.

BAIN-MARIE

Its size 2 x GN 2/3 can easily contains buns and sausages. Covered with a special lid, it will keep a desired temperature. The bain-marie is heated by a gas burner so a bike is completely independent from electricity.

SHELF FOR PREPARED HOT DOGS

In order to facilitate your customer service, we prepared a special place where you can put your hot dogs.

HANDLE FOR TONGS

Cooking accessories is an important issue. In our bike, we care about every detail, so we designed a special handle for tongs.

Rear wheel size: 20"

POWER SUPPLY – HOW DOES IT WORK?

Due to reliable mobile power technology, gastronomic bikes may work up to 48 hours. A source of power for our bikes are gel batteries which are environmentally-friendly as they do not expend dangerous emissions of sulphuric acid. Their ABS case guarantees safety during moving. The installation includes battery, converter and external charger. Charging time is approximately 6 hours. The installation includes a display on which you can check the battery level. Do not overcharge the devices. Overtaking the average parameters may cause damages in a converter. Do not discharge the battery completely as it may impact its durability.

WHAT IS A CARRYING CAPACITY OF A BIKE?

Total permitted weight including a person, devices, and products is 500 kg.

IT IS POSSIBLE TO ORDER A BIKE FROM WHICH I CAN SELL ICE CREAMS, COFFEE, JUICES AND SANDWICHES AT THE SAME TIME?

Such an extensive sales profile is not possible while considering a gastronomic bike. Because of a limited space available on a bike, you need to define a product you will sell. It is necessary to reach a compromise between accessories (appropriate devices), size (to be mobile it can't be too big), storage cabinets (selling too many products, there won't be enough space to storage them), and electric installation (size of a battery, and gas cylinder). Therefore, we recommend to consider a product you would like to sell from a bike.

CAN I RIDE ON A GASTRONOMIC BIKE COMFORTABLY?

On a flat surface you can ride on a bike comfortably. You need to be careful on bumpy roads, as well as on kerbs. Overcoming long distance may be burdensome because of the weight of a bike. If a place where you storage a bike is located far from a sale place, we recommend electric engine or to transport a bike by car or trailer.

HOW CAN I ORDER A BIKE?

You need to choose a bike, accessories, and a colour of a bike. We prepare a technical drawing with a description to make sure everything is clear. If necessary, we can make a visualisation which costs 300 PLN net.

While placing an order, you need to pay 50% of the total amount as a advanced payment. The other 50% need to be paid before delivery of a bike. A bike may be shipped while to total amount was paid. If it is possible, we recommend you to come and check a bike before shipment.

**ARE THE PRICE AND A PAYMENT METHOD
NEGOTIABLE?**

The price should be set individually with your local distributor. Special discounts are available from 3 bikes purchased one-time. While ordering one bike, the price is constant.

A production of a bike takes 5-6 weeks. Sometimes, it is possible to produce a bike a little bit faster - it depends on the quantity of orders on our production. In case of busy time on production, the term may be extended, and we always inform about it. You should remember that while a bike is ready and, for example, we will receive your payment few days later, a lead time will be longer.

IS A SHIPMENT INCLUDED?

No. The service is provided by an external company. Please note that we are not responsible for the delivery time.
