

Mobile carts

Endless possibilities

GASTRO

WHY CHOOSE US?

Mobile gastronomy is a trend which becomes more and more popular. From a mobile sales points we may sell increasingly interesting products.

Street food is not only an interesting adventure for young people but also an attractive alternative for people running gastronomic business.

A mobile cart may be an entirely new concept as well as a mobile supplement of your already existing gastronomy.

We have prepared two types of trolleys, in two size variants, which can be easily adapted to the sale of most products.

Due to our proposition, you can easily match a cart to your product as well as maximise your profits in a small space.

High product quality together with visual and technical details as well as possibility of modification in cabinets and devices make each cart a tailor-made product.

Mobile cart with straight top 1500
